

Kopernik Global All-Cap Equity Fund

C share class

Objective

The Fund seeks to provide long-term capital appreciation by investing primarily in equity securities of U.S. and non-U.S. companies. The research driven investment process seeks to add value through active management and by selecting securities of companies that, in the manager's opinion, are misperceived and undervalued by the market. The Fund may invest in any country, market, and sector/industry across the market capitalization range within the Fund's predefined investment guidelines.

Investment Strategy

The Fund's Sub-Investment Manager, Kopernik Global Investors, LLC, was launched by David Iben on July 1, 2013 and operates out of Tampa, Florida. The firm provides investment management services for investment funds, institutions and separate accounts. Kopernik is a client-centric, 100% employee owned firm and many employees are invested in the firm's strategies.

The investment philosophy is that markets are inherently inefficient and significant alpha may be gained on a global basis via independent thought and rigorous research. Kopernik believes that only through bottom-up fundamental analysis may a thorough, forward looking understanding of a company's business and valuation be gained. Kopernik views value as a prerequisite, not philosophy and views itself as owners of businesses.

Risk Warnings

The Fund is subject to special risk considerations including geographic concentration risk, portfolio concentration risk and operational risk. The investment return and principal value of an investment will fluctuate so that the investor's shares, when redeemed, may be worth more or less than their original cost. Any investor should consider the investment objectives, risks and charges and expenses of the fund carefully before investing. Where an investment is denominated in a currency other than the investor's currency, changes in rates of exchange may have an adverse effect on the value, price of, or income derived from the investment.
