

Driehaus Emerging Markets Sustainable Equity Fund

B share class

Objective

The strategy seeks capital appreciation by investing in common stocks of issuers who derive earnings and profits from the developing markets. There is no hedging nor any derivative overlays. The Portfolio is built completely from the bottom-up, with an active investor mentality and is largely benchmark agnostic with respect to security, sector, and regional/country weights.

Investment Strategy

The Fund's Sub-Investment Manager, Driehaus Capital Management LLC, is a privately-held boutique asset management firm located in Chicago, USA. The firm was founded in 1982 and has USD 12 billion of assets under management.

The investment style is a bottom up growth equity investment approach. The strategy exploits equity market inefficiencies that materialize following inflection points, combining fundamental, behavioural, and macro analysis as well as integrating environmental, social and governance ("ESG") criteria as part of the investment research process. The approach focuses on companies with strong or improving ESG attributes and growth opportunities tied to social and environmental solutions, and robust governance structures. It also includes evaluating fundamental factors relating to the companies such as the competitiveness of the relevant industry, the company's business model, recent and projected financial metrics and upcoming product releases to be introduced by the company. Macroeconomic or country specific analyses are also utilized to evaluate the sustainability of a company's growth rate.

Risk Warnings

The Fund is subject to special risk considerations including geographic concentration risk, portfolio concentration risk and operational risk. The investment return and principal value of an investment will fluctuate so that the investor's shares, when redeemed, may be worth more or less than their original cost. Any investor should consider the investment objectives, risks and charges and expenses of the fund carefully before investing. Where an investment is denominated in a currency other than the investor's currency, changes in rates of exchange may have an adverse effect on the value, price of, or income derived from the investment.
