ISIN: IE00BH3Z9P87

OBJECTIVES AND INVESTMENT POLICY

Objective

The investment objective of the Fund is to achieve long-term capital growth.

Investment Policy

The Fund uses a growth style of investment in US small-capitalization companies within the same market capitalization range as those included in the Russell 2000 Growth Total Return Index. The Sub-Investment Manager seeks out investments with good growth potential where investment decisions are based on the belief that fundamentally strong companies are more likely to generate superior earnings growth on a sustained basis and are more likely to experience positive earnings revisions.

Investment decisions also involve evaluating a company's competitive position, evaluating industry dynamics, identifying potential growth catalysts and assessing the financial position of the relevant company. Investment decisions will also be based on an evaluation of the relative valuation of the company and macroeconomic and/or technical factors, such as economic growth, inflation and stock market volume statistics, affecting the company and its stock price.

The Fund is actively managed which means that the Sub-Investment Manager is actively making investment decisions for the Fund. The Fund is not managed by reference to any benchmark.

Dividend Income

Dividend Income that the Fund receives is automatically reinvested in to the Fund and is thus part of the share value.

Investment period

The Fund is suitable for investors who seek capital appreciation over a long-term horizon but who are prepared to accept a medium to high level of volatility from time-to-time. The Fund is not designed for investors who need current income.

Subscription and redemptions of the shares can be carried out by 14:00 hours Ireland time on all Irish and United Kingdom business days and days on which the New York Stock Exchange is open for trading.

Further information on the Fund's investment objective and policy can be found in the Fund's Prospectus.

RISK AND REWARD PROFILE

Lower risk Higher risk

1	2	3	4	5	6	7
---	---	---	---	---	----------	---

This indicator table demonstrates where the Fund ranks in terms of its potential risk and reward.

The risk assessment is based on historical data and is not guaranteed to remain unchanged. It may change over time and may not be a reliable indication of the future risk profile of the Fund.

The lowest category does not mean risk free as all investments involve risks.

This Fund is ranked at 6 because funds of this type have experienced high rises and falls in value in the past.

Gains or losses for individual shareholders will therefore depend on the exact timing of the subscription and redemption of shares.

The Fund invests in a wide range of securities in various sectors. The Fund spreads risk by means of this diversification.

The following risks may not be fully captured by the Risk and Reward Indicator:

- events over which the Fund has no control, such as political or global economic risks
- in the event that the Fund does not achieve its investment objective
- The securities of small-cap companies may be more volatile in price, have wider spreads between their bid and ask prices, and have significantly lower trading volumes than the securities of larger capitalization companies.

Additional risks are detailed in the Prospectus. This list does not purport to be exhaustive and risks of an exceptional nature may arise from time to time.
